BROSA

ASSEMBLY GUIDE

Bouverie Armchair

Components

Upon unpacking your chair from its delivery box, you should have one single component (the body of the chair). Additional components are packed inside the body, you will learn how to access and utilise these components in the next steps.

Chair body x 1

Unpacking

Turn the chair body so that the underside is facing you. Lift the fabric of the base of the chair to reveal the hidden compartment where the counterparts of the chair are hidden. Remove the parts and leave the hidden compartment open as you need access for assembly.

Step 1

| | |
|--|--|
|  A x 2 |  D x 8 |
|  B x 2 |  E x 8 |
|  C x 8 |  F x 1 |

Starting with the front legs, insert a leg (A) into the corresponding slot. Fit a spring washer (E) to a bolt (C) followed by a washer (D) and fit it into one of the screw holes. Repeat for the second screw to fit the leg into the frame of the chair. Turn the bolt with the allen key (F) until it is secure but do not tighten yet. Repeat for all four legs. Please note that the back legs (B) are both the same and are to only go at the back of the chair.

Step 2

Lift the chair off the ground and turn it right side up while being careful not to put any pressure on the legs while you turn the chair.

Step 3

Place the chair on a flat surface, then sit on the chair and shift your weight around until the legs are level and the chair does not rock. Then use the allen key (F) to tighten all the bolts.

Step 4

Turn the chair upside down one last time and pull the material cover to conceal the underside of the chair and secure it back into its original place. Lift the chair and place it on its legs and now enjoy your new armchair!
